OBJECTIVE

Full Stack Software Developer with a Creative Arts and Humanities background. I am constantly learning new technologies with the goal to be a part of an enthusiastic and talented team.

SKILLS & ABILITIES

Languages: JavaScript, Python
Front-End: React, Handlebars, Vue, jQuery, AJAX
Back-End: Node/Express, Google OAuth, Sequelize
Databases: MongoDB, MySQL
Deployment/Other: Heroku, Git, Linux

Education

University of Texas in Austin, *Coding Bootcamp Certificate Program*
December 2019 – May 2020

PROJECTS / EXPERIENCE

DevMatch, *Authentication/Back-End - A great application for inspiring and experienced developers to connect and collaborate with the best talent in the world of coding and web development!*

Design-A-Date, *Back-End Developer – An application designed to plan a good time with ease and less indecisiveness. Populate the nearest cinemas by zip code.*

ExpediLog, Front-End Developer – A user may utilize this journal log to document their memories as well as adding their geographical location. Great application for travelers.
